

December Newsletter

Everyday Explorers

We have had a lot of fun learning about “Science in the Air” last month. We learned about our how airplanes fly, how birds fly, and about how germs move around in the air.

In December, we will continue our exploration. We will be doing Science using Christmas objects and colors this month. We will be looking at the following themes this month:

December 3: Magnets

December 10: Density

December 17: Christmas Science

We will talk about magnets, why some liquids mix and some do not, and fun experiments that involve Christmas and Winter. We will be doing some experiments, reading books, and using our hands to explore!

If you have any questions or concerns, please don't hesitate to contact us.
