

November Newsletter

Everyday Explorers

We have had a lot of fun learning Halloween Science last month. We learned about our 5 senses, music, and did some pumpkin science.

In November, we will continue our exploration. We will be doing AIR SCIENCE this month. We will be looking at the following themes this month:

November 12: Airplanes

November 19: Birds

November 26: Space

We will talk about how airplanes and birds fly, what is air made of, and Space. We will be doing some experiments, reading books, and building things that fly!

If you have any questions or concerns, please don't hesitate to contact us.
