

October Newsletter

Everyday Explorers

Dear Parents,

We have had a great 1st month of Everyday Explorers. We have learned about what happens when we mix colors, how to be architects, and about static electricity.

In October, we will continue to explore the world of science. We will be looking at the following themes this month:

October 15: 5 Senses

October 22: Sound & Making Musical Instruments

October 29: Pumpkin Science

We will be practicing our writing skills by using our science notebooks to keep track of our thinking during each week. We talk through the scientific process to see what each student thinks will happen and why.

If you have any questions or concerns, please don't hesitate to contact us.
